M J S Beavis BSc

Published by The Institute of Physics, 47 Belgrave Square, London SW1X 8QX

Published bi-monthly except May, June and July when monthly. Further details from Circulation Department, The Institute of Physics, Netherton House, Marsh Street, Bristol BS1 4BT

Printed in Great Britain by Leicester Printers Ltd. Set in 9/11pt Times

Index to Volume 8

Subjects

(L) denotes Letter to the Editor,
(N) short note,
(R) conference or exhibition report.

Acoustics Group competition 238(N)
Acoustics Group project competition 1971/2 254
Adding machine, A simple 376(N)
'Adventures in Experimental Physics' 2(N)
A level comprehension 2(N), 293(L)
A level, National 435(R)
Antimatter 359(L)
Antimatter—some recent developments 50
Apollo science 466
ASE annual meeting, Manufacturers' exhibition at the 278(R)
ASE science meeting 246(N)
ASE Scottish Branch Annual General Meeting 402(R)
Association for Programmed Learning and Educational Technology international conference 309(R)
Astronomy in school 437
Astronomy in the study of physics 449
Astronomy, Projects in 434(N)
Avogadro's number and Avogadro's constant 275

BEd physics degree at London University 339
Bicycle problem 421(L)
Biophysics teaching 367(N)
Black body radiation 60(L)
Book reviews 62, 124, 295, 360, 422, 497
Bootstraps—an alternative philosophy 325
Bragg Medal and Prize 96
Brain teaser 10, 246, 308, 410, 481
Budgeting from need 67(N)

Cancer therapy and high energy physics 256
Capacitance of concentric spheres 122(L)
Capillarity 122(L), 294(L)

Capillary rise 293(L)
Centrifugal force 359(L), 420(L), 495(L)
Clean surfaces 315
Coincidences applied to an interference refractometer, Method of 274
College Science Teaching, Journal of 367(N)
Composite materials 436(N)
Computer assisted learning 237(N)
Computer education 94(N)
Computer education, Diploma in 346(N)
Computer education in schools 304(R)
Computer Education News 44(N)
Computer gallery 246(N)
Computers and school 324(N)
Computer sciences in secondary education 65(N)
Computer simulation 436
Computers in technology 308(N)
Computers in the curriculum 68(N)
Computing at the Open University 366(N)
Computing for teachers 280(N)
Computing in schools 122(N), 365(R)
Conducting paper and paint 246(N)
Conferences and courses 64, 127, 300, 364, 431, 458(N), 500
Conveyor belt problem 419(L)
Copernican revolution 455
Courses at Manchester 417(N)
Critical properties of gases, Simple apparatus for measuring the 283
Cryogenics and the liquefaction of gases 264(N)
Crystallography and spectroscopy 414(N)
Current as a flow of electrons 419(L)

Developments in schools 11
Diffusion cloud chamber for demonstration purposes 42

Earth, The primitive 459
Education aids 107(N)
Education and careers in acoustics 26(N)
Education, Frontiers in 328(N)

Physics Group for Manchester 239(N)
 Physics in New Zealand, Teaching 247
 Physics Interface Project 78(N), 109
 Physics, Learning 69(N)
 Physics of solids 373(N)
 Physics of solids, Resources in 3(N)
 Physics software for schools 79
 Physics, Teaching 292(L)
 Physics teaching and the new mathematics 2(R)
 Physics teaching, Demonstrations in 373(N)
 Physics teaching in the late nineteenth century: A case history 368
 Physics teaching, Research group on 302(N)
 Plane angle and pi as physical quantities 408
 Planetarium program, New 23(N)
 Planetarium, The London Schools 486
 Plastics technology for teachers 338(N)
 Practical physics in a technological university 329
 Practical physics in the University of Ghana, First year 415
 Preparation of physics teachers for secondary schools:
 The role of university physics departments 377
 Preston Observatory 471
 Project Technology 3(N)

 Quantum mechanical tunnelling using thin soap films, A study of 117
 Queries in physics 10, 101, 228, 324, 404, 454

 Reception of poor television signals 124(L)
 Rotational motion and centrifugal force 77
 Royal Astronomical Society Education Committee 436(N)
 Rutherford scattering apparatus, A novel design of 97

 Sampling 53
 School, Back to 66(R)
 School radiotelescope 462
 School technology 107(N)
 School Technology Programme, The 70
 Science and colour 264(N)
 Science and Society: a new course at Bingley College of Education 289
 Science and society: The Malvern course 27
 Science degree course at Luton, New 414(N)
 Science of what we wear, The 108(R)
 Science teaching materials, Early 239(N)
 Scientists in space 444
 Secondary school curriculum and science education, The 19
 Second law, Infringing the 292(L)
 Separation of nominally equispaced variables, A procedure for determining the 281
 Sinusoidal oscillations, Adding 420(L)
 Sixth form physics course 26(N)
 Social responsibility and education in physics 4(R)

Social responsibility in a historical and educational setting 7
 Social responsibilities of physicists 1(R)
 Social responsibility—what are the important issues? 24
 Solar system and its origin 475
 Speakers for The Institute of Physics 376(N)
 Statistics for A level 308(N)
 Students' conference 116(N)
 Symmetry 303(N)

 Teaching science at the Open University 17
 Technology, Living with 26(N)
 Technology teaching 355(N)
 Technology, Where is it leading us? 346(N)
 Telescope, A low cost reflecting 482
 Television camera 379(N)
 Temperature and the ideal gas 385
 Temperature, The concept of 60(L)
 Tensile testing, A demonstration of the principles of 265
 Theatre lighting 358(N)
 Thermodynamics, Problems of teaching 1(R)
 Time independent fluids 333

 'Understanding electricity' 280(N)
 Underwater cables 461(N)
 University degree performance, A prediction from A level performance of 106
 University physics item bank 3(N)

 Vacuum gauge project, A simple 326
 Viscoelastic liquids, Demonstrations with 111

 Weight 359(L)
 Weight, g and weightlessness 61(L)
 Why is this a bad question? 328

 X rays and radioactivity 246(N)

 Yield point 496(L)
 Young's eriometer: History and modern teaching use 392
 Young, Thomas 1773–1829 396

Contents of Volume 8

January 1973

- Social responsibility and education in physics 4
Social responsibility in a historical and educational setting: F R JEVONS 7
Developments in schools: JOHN R BAKER 11
Teaching science at the Open University: P F CHAPMAN 17
The secondary school curriculum and science education: DAVID LAYTON 19
Social responsibility—what are the important issues?: M M WOOLFSON 24
Science and society: The Malvern course: JOHN L LEWIS 27
Geophysical exploration of the seas: M BROOKS 35
Diffusion cloud chamber for demonstration purposes: B N C AGU 42
Employability of physics graduates: COLIN GREAVES 45
An improved Lecher wire experiment: M B ALLEN-SON, A R PIERCY and K N R TAYLOR 47
Antimatter—some recent developments: T P SWETMAN 50
Sampling: M F JAMES 53
News and comment 1 Physics apparatus 33 Letters 60 Book reviews 62 Forthcoming conferences and courses 64

March 1973

- The School Technology Programme: GEOFFREY SNEED 70
Rotational motion and centrifugal force: SYED ZIAUDDIN 77
Physics software for schools: PETER ASHWORTH 79
Gravitational collapse and black holes: LEWIS RYDER 86
An improved field plotter: R MORGAN and V MORGAN 92
Bragg Medal and Prize 96

- A novel design of Rutherford scattering apparatus: T W EATON and D CHEETHAM 97
John Harrison: G A COX 102
A prediction from A level performance of university degree performance: W H KING 106
The science of what we wear: R G STANSFIELD 108
The Physics Interface Project: C A TAYLOR 109
Demonstrations with viscoelastic liquids: A A COLLYER 111
A study of quantum mechanical tunnelling using thin soap films: M W CHARLES 117
News and comment 65 Physics apparatus 95 Letters 122 Book reviews 124 Forthcoming conferences and courses 127

May 1973

- Physics courses in higher education
Introduction 129
Physics degree courses: C A BATES 135
Courses in physics in England, Wales and Northern Ireland 143
Courses in physics in Scotland 217
Courses in Eire 225
Courses in physics in medical colleges 227
Index 231

June 1973

- New mathematics and physics: J GOODIER 239
The mathematical needs of A level physics students 241
Teaching physics in New Zealand: L F PERRIS 247
Objective tests and their construction: R E DIMES 251
Acoustics Group project competition 1971–2: L MACKINNON 254
Cancer therapy and high energy physics: T P SWETMAN 256

Measurement of magnetic field using a current galvanometer: G J AITCHISON 257
 The structure of large molecules: J E LYDON and B SHELDRIK 259
 A demonstration of the principles of tensile testing: M V ANANTHAKRISHNAN 265
 Optical studies of artificial earth satellites: D A RICHARDS 267
 The method of coincidences applied to an interference refractometer: J HILTON 274
 Avogadro's number and Avogadro's constant: R O DAVIES 275
 Manufacturers' exhibition at the ASE annual meeting: ERIC DEESON 278
 A procedure for determining the separation of nominally equispaced variables: C JAMES 281
 Simple apparatus for measuring the critical properties of gases: G B DONALDSON 283
 Science and Society: a new course at Bingley College of Education: B GRESSWELL 289
 News and comment 237 Letters 292 Book reviews 295 Forthcoming conferences and courses 300

July 1973

N and F and related matters: J GOODIER 303
 Physics and literature in this century: a new course: ALAN J FRIEDMAN 305
 APLET international conference: P J HILLS 309
 Parametric oscillators and amplifiers: Part 1: B K JONES 310
 Clean surfaces: J A D MATTHEW 315
 A statistical analysis of the Nuffield physical science project assessment: S W HOCKEY 322
 Bootstraps—an alternative philosophy: T P SWETMAN 325
 A simple vacuum gauge project: J JONES and F H SIKWESE 326
 Practical physics in a technological university: S E WARREN 329
 Graphical linear interpolation: D A RICHARDS 332
 Time independent fluids: A A COLLYER 333
 The BEd physics degree at London University: R O DAVIES, M G EBISON and M UNDERWOOD 339
 Probe for three dimensional magnetic field plotting: M SLAFFER 344
 The gravitational analogue in physics teaching: P H BLIGH and B RAY 347
 An interferometric method of measuring some physical properties of solids: D CHEETHAM and T W EATON 350
 Elasticity in physics and mathematics: R W WHORLOW 356
 News and comment 301 Physics apparatus 321

Letters 358 Book reviews 360 Forthcoming conferences and courses 364

September 1973

Physics teaching in the late nineteenth century: A case history: J M GREGORY 368
 Parametric oscillators and amplifiers: Part 2: B K JONES 374
 The preparation of physics teachers for secondary schools: The role of university physics departments: D A TAWNEY 377
 Holography using fine grain film: P J HANDFORD 380
 Photoelectric effect, a common fundamental error: A N JAMES 382
 Temperature and the ideal gas: R E DAISLEY 385
 Young's eriometer: History and modern teaching use: S GEORGE and M GUARINO 392
 Thomas Young 1773–1829: G A COX 396
 The Higher Education Learning Project—Physics: J M OGBORN and P J BLACK 400
 ASE Scottish Branch Annual General Meeting: W H JARVIS 402
 Operational amplifiers: L N S KUNAR 405
 Plane angle and pi as physical quantities: J G WINANS 408
 General relativity and energy: A T JACKSON 411
 First year practical physics in the University of Ghana: G MCCLELLAND 415
 News and comment 365 Physics apparatus 391 Letters 417 Book reviews 422 Forthcoming conferences and courses 431

November 1973

Astronomy in school: E A BEET 437
 Scientists in space: J P ALLEN 444
 The place of astronomy in the study of physics: R A R TRICKER 449
 The Copernican revolution—from then to now: J RAVETZ 455
 The primitive earth: so near to hell: R JASTROW 459
 A school radiotelescope for two metres: J C CODLING 462
 Apollo science: G M BIGGAR 466
 The Preston Observatory: V BAROCAS 471
 The solar system and its origin: J R DORMAND 475
 A low cost reflecting telescope: D A MORRIS 482
 The mystery of the missing neutrinos: L H RYDER 484
 The London Schools Planetarium: P RICHARDS-JONES 486
 Lunar exploration 1958–73: G E PERRY 488
 News and comment 433 Physics apparatus 443 Letters 495 Book reviews 497 Forthcoming conferences and courses 500
